

Data Overview

Pretend Elementary School (K-4)

July, 2011

Faculty Meeting

Cheryl Usher

Who can benefit from Data?

Teachers can use data to improve student learning.

How?

By examining various types of data we have available and seeing how we can change our instruction to improve student learning and narrow achievement gaps with our subgroups..

Data to examine

School Demographics

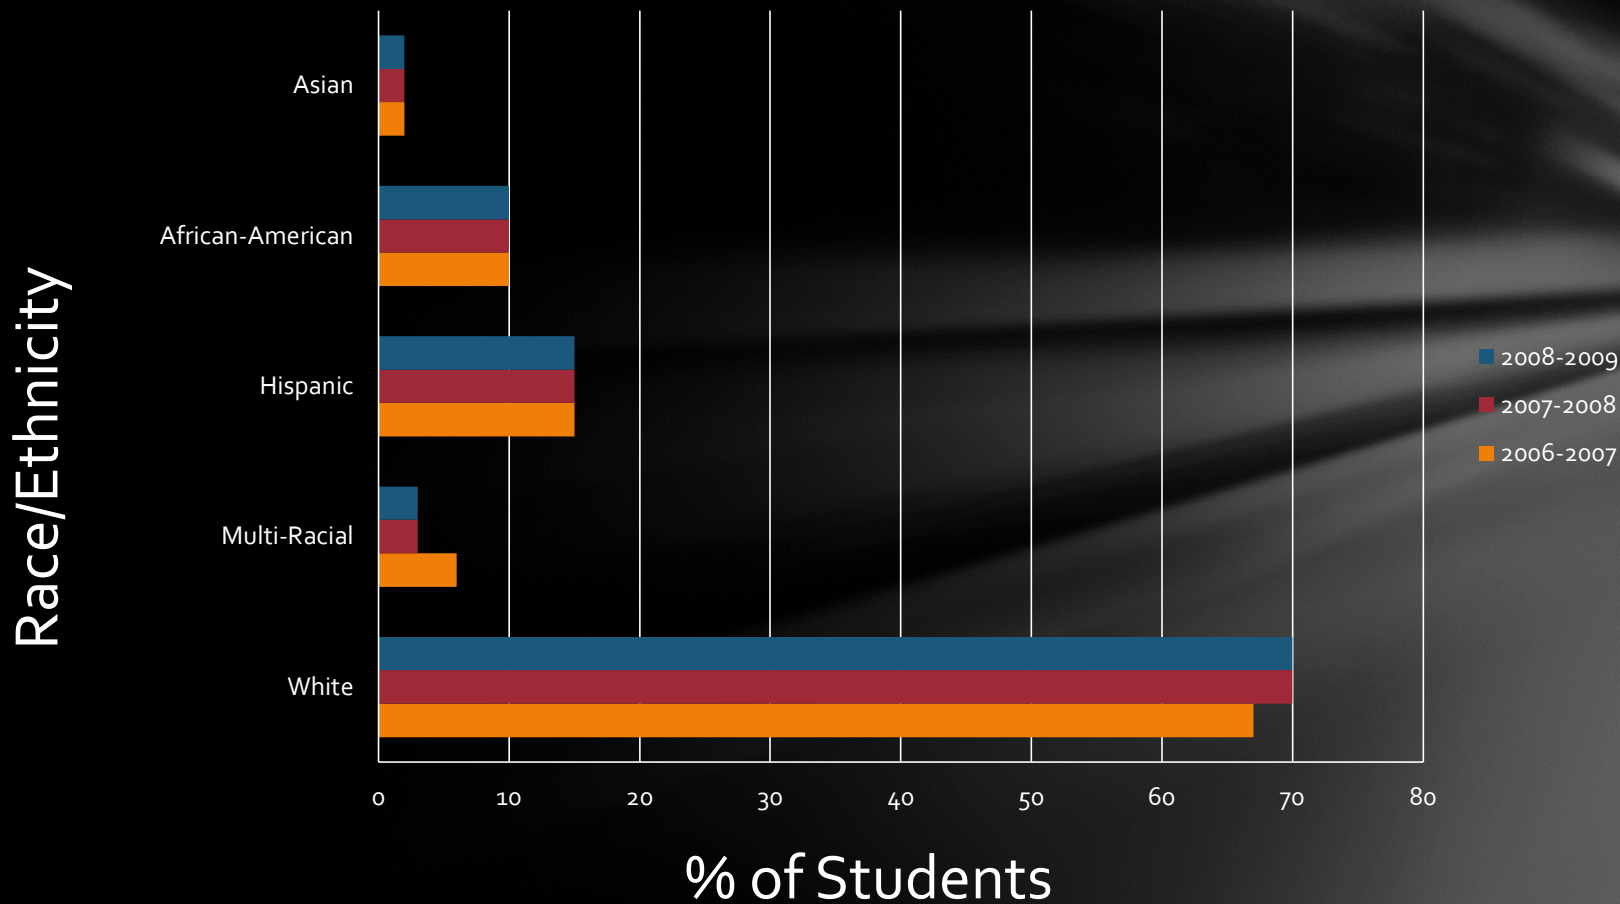

Attendance

CRCT Test Results

We will be working in small groups to discuss questions on most slides.

School Demographics

Race/Ethnicity 2007-2009

What changes do you see in our race/ethnicity groups over the last 3 years?

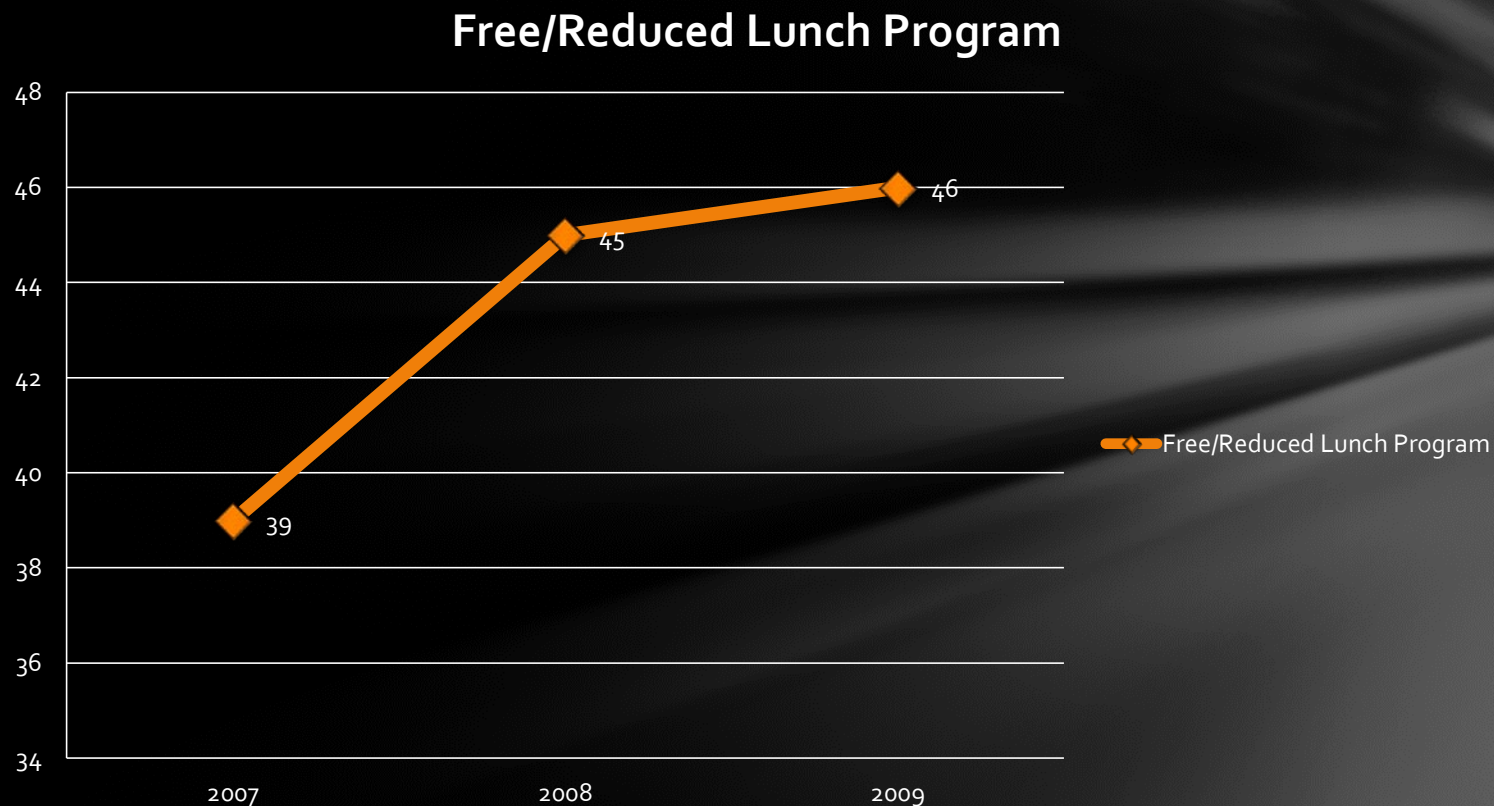

School Demographics

Male vs. Female

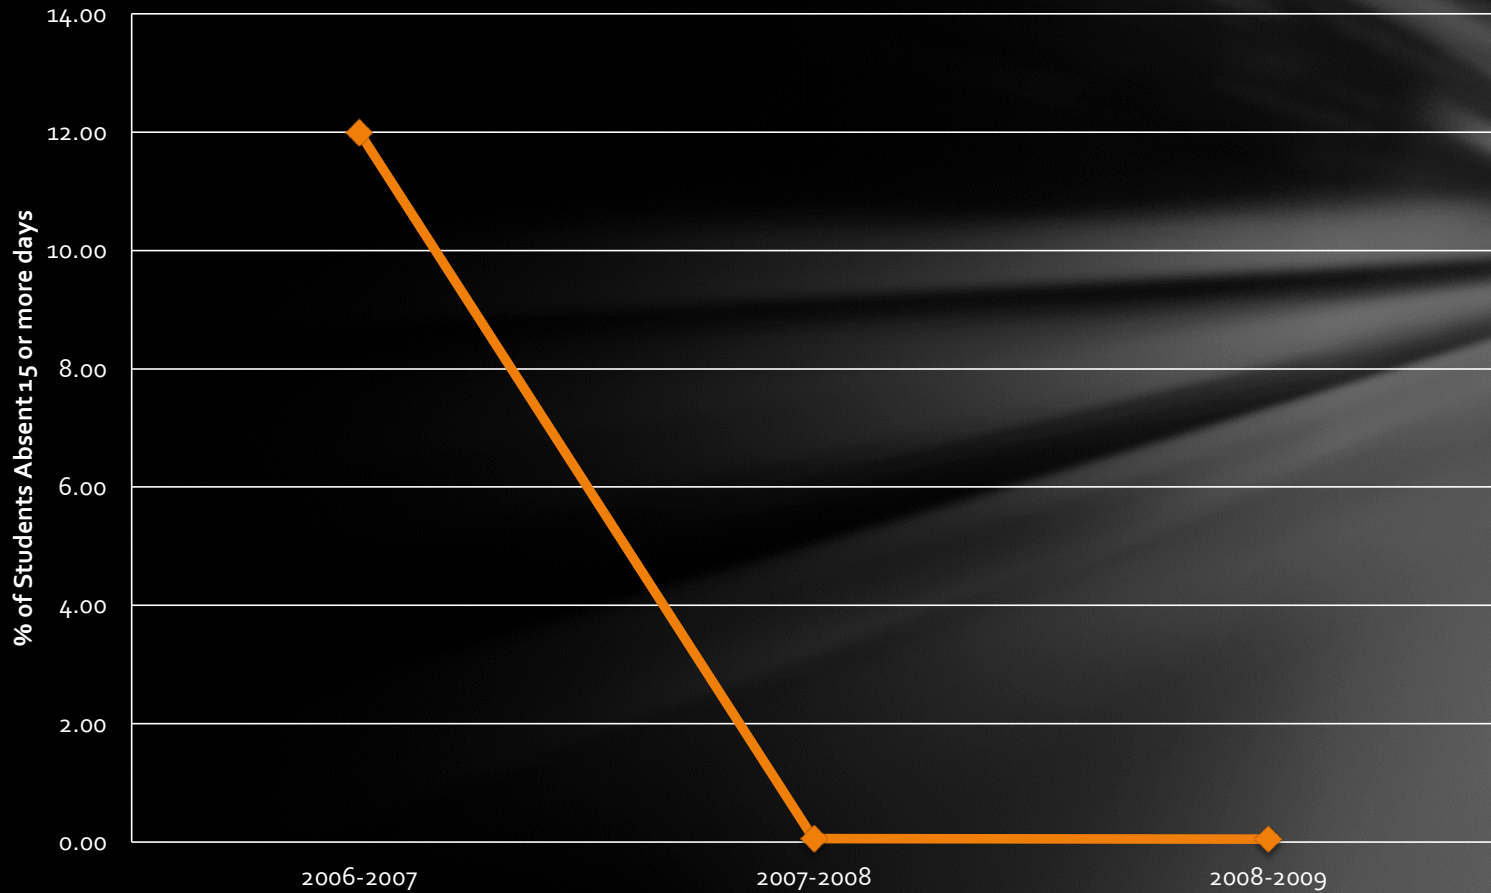

School Demographics

Free and Reduced Lunch

How does the increase in our free and reduced lunch percentages affect learning?

Percentage of Students Absent 15 or more days

Amazing attendance improvement!

Reading CRCT Results

Our school scores are higher in reading than the state in almost all grade levels.

Math CRCT Results

How does our school compare to the district? To the state?
 We are weaker in math than reading.

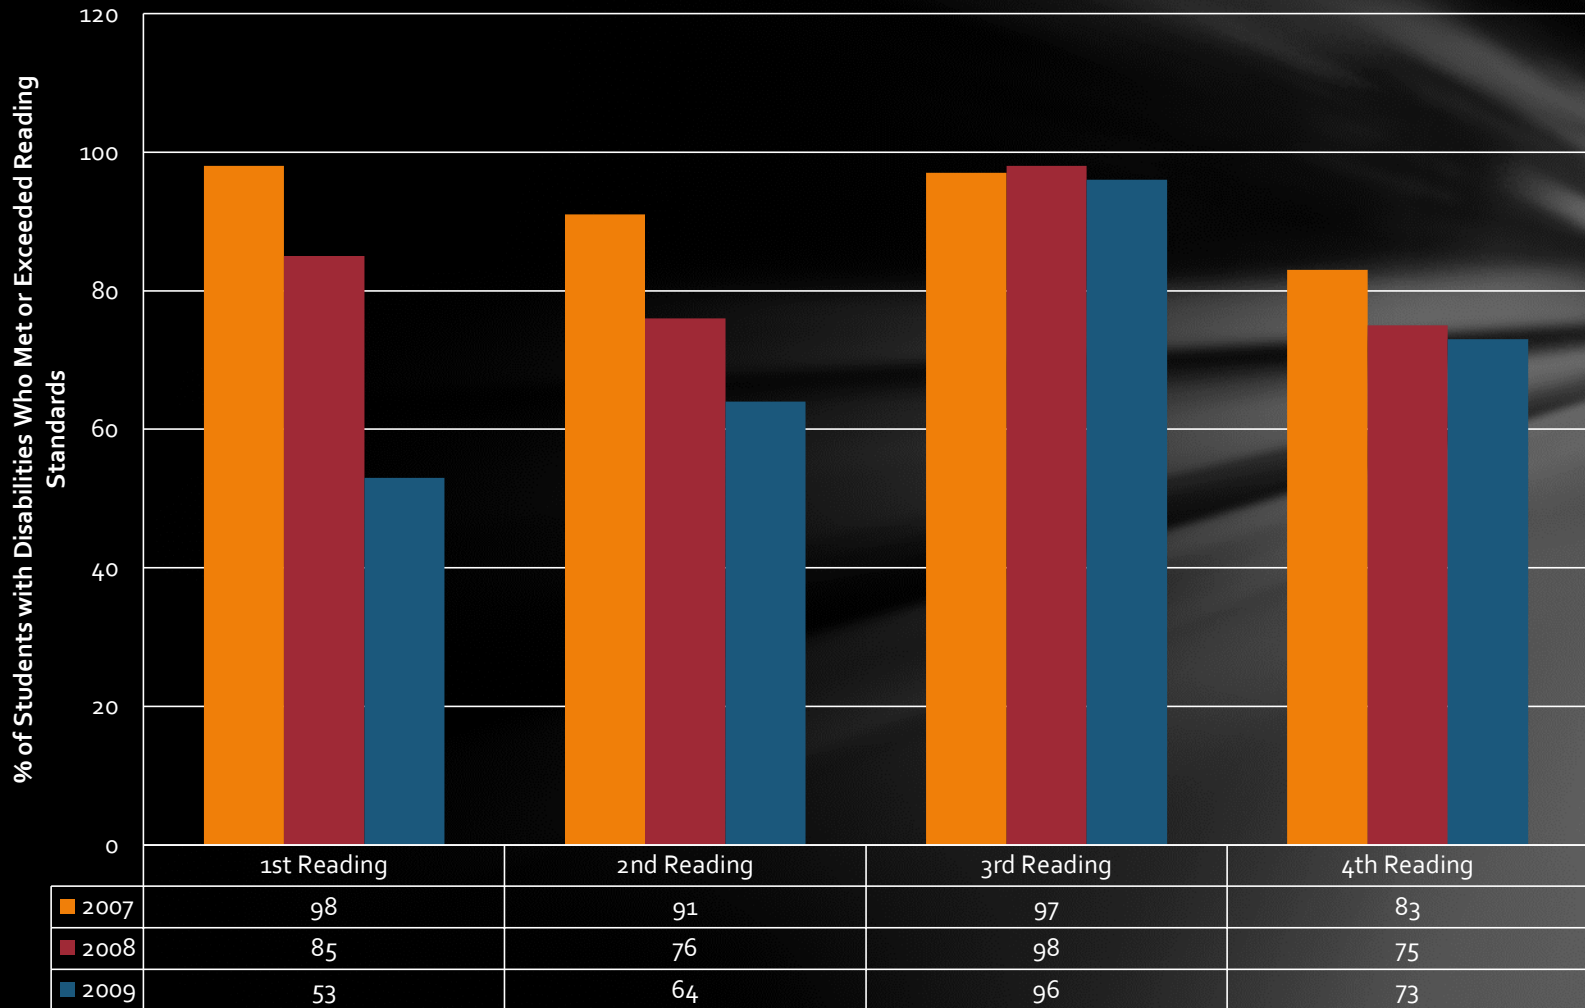

School Demographics

% of Students with Disabilities

Reading CRCT Results

% of Students with Disabilities who meet or exceed standards

What instructional strategies worked?

Math CRCT Results

% of Students with Disabilities who meet or exceed standards

What instructional strategies worked?

Reading CRCT Results

% of Students by Race/Ethnicity who meet or exceed standards

What instructional strategies worked and which ones didn't?

Math CRCT Results

% of Students by Race/Ethnicity who meet or exceed standards

What instructional strategies worked and which ones didn't?

Where do we go from here?

After looking at today's data-

Where are you and your team going to look to improve instruction and student learning?

- By Various Content Areas?
- By Strand, Domain and Item Analysis?
- Student work?
